STATEMENT IN ACCORDANCE WITH 37 CFR 1.98(a)(3)(i)

I, Vladimir M. Segal, hereby set forth a concise statement of the relevance of the non-English language document "Processes of Plastic Structure Formation", by V.M. Segal, V. I. Reznikov, V.I. Kopylov, D. A. Pavlik, and V. F. Malyshev; Minsk, Science and Engineering, (1994) which was published in Russia (in the Russian language). As one of the authors of the Russian document, I am the individual designated in 37 CFR 1.56(c) who is most knowledgeable about the content of the document.

The portions of the reference of possible relevance are Chapters 1) Simple shear in material processing; Chapter 3) Equal channel angular extrusion processing; and Chapter 4) Forging and extrusion with additional shear. Chapter 1 is primarily a discussion of the theory of shear and includes theoretical analysis of stress-strain that occurs during equal channel angular extrusion (ECAE). Chapter 3 is a presentation of concepts associated with the ECAE process, apparatus for conducting ECAE, and various ECAE processing routes. Chapter 4 discusses combined processing, analysis of combined loading and extrusion with transverse shear.

The relevance of the portions of the reference indicated above is with respect to general ECAE processing techniques and apparatus parameters, and the effect of these parameters on shear produced during the ECAE processing.
